Re: Total Volatile Organic Compounds Analysis

On June 29th 2011, The University of Illinois at Chicago Environmental Health and Safety Office representatives evaluated the ChemFree SmartWasher "Ozzy Mats" for total volatile organic compounds (TVOC) concentrations. The MultiRae 4 gas meter was used to detect VOC's. No VOC's were detected. Therefore The University of Illinois at Chicago's Transportation Department are able to dispose of the mats as a general waste.

I was pleasantly surprised at this reading.
