Our ChemFree parts washer has been accepted for use by our technicians for the following reasons:

Positives include:
Effectiveness
Portability
Safety, minimal V.O.C.'s
Warm on hands
Ease of maintenance

No discoloration was shown after a 12 hours soak/comparison on chrome frame rails from a late model Ultra.

We were initially using a Safety Kleen unit, but after testing the ChemFree unit, we purchased the ChemFree and have been satisfied with our choice!

Regards,

Brad Darville
